Safe Practice

- A safe BBQ is conducted by using charcoal, matches and on occasions a small amount of firelighters.
- Only use enough charcoal to cover the base to a depth of about 50mm / 2 inches
- Ignition fluids and in particular petrol, are not to be used to assist ignition or during the use of the BBQ
- Keep all loose clothing away from the BBQ
- Keep children and pets away from the cooking area.
- NEVER leave the BBQ unattended when in use.
- When cool, remove the ash and empty inside a bag.

Vindomora Country Lodges - BBQ

- Children MUST be supervised AT ALL TIMES when BBQ's are in use.
- Tell children about the high surface temperatures and keep them away from the BBQ so they avoid getting burned or igniting their clothes.
- Do not place clothing or other flammable material on or near the BBQ.
- Keep combustible materials away from the BBQ to avoid the possibility of igniting such materials. (E.g. clothing, furniture, newspapers, books)
- Fire extinguishers are located in each lodge. A Fire Bucket is next to each BBQ.
- Smoke from charcoal and other material that is not burned completely contains a number of chemicals, including Carbon Monoxide (CO₂) which is odorless, colourless and can be deadly.
- In the event of a fire, dial 999 and follow the Fire Evacuation procedures.
